

A NEW LOOK

MB&F

In 2006 MB&F released the HM1 model, and in 2009 pay tribute to the radical design with two new versions, the HM1-Black and HM1-RS. The HM1-RS is a rose gold piece with a full sapphire "skeletonized" dial. The sapphire dial reveals the insides of the machine while the numerals are laser cut and affixed directly to the top plate of the movement. HM1-Black uses the same sapphire dial, but in a black PVD white gold case. Each is limited to ten pieces. www.mbandf.com
